Press Release

Thermal Design Announces Addition to Inside Sales Staff

Promoted Salesperson to Focus on Midwest States

Madison, Nebraska—February 8, 2006—Thermal Design is proud to announce the promotion of Valorie Beveridge to their sales office in Madison, Nebraska.

Valorie will become the Midwest Territory Sales Manager, assuming North Dakota, South Dakota, Nebraska and Kansas sales territories from Ross Gronau. Dividing this productive territory will allow each salesperson to devote the necessary care and attention to each project as well as expand Thermal Design's inside sales knowledge base.

Valorie's background includes quality control and supervisory responsibilities at Wiese Research and at a national construction materials retailer. She has several years of experience at Thermal Design in bookkeeping and production and was promoted to the Midwest Sales position in January.
