

SIMPLE SAVER SYSTEM®

The Simple Saver System reduces costs for municipal maintenance buildings.

Municipal government managers are constantly under pressure to increase efficiency and lower energy costs within essential departments. If these day to day challenges include staying on budget while assigning operating funds for other projects, Thermal Design's Simple Saver System can help. The Simple Saver System was designed to reduce common building maintenance as well as provide a comfortable working indoor temperature for your employees and equipment, thus increasing productivity.

The Simple Saver System strives to be the best insulation system on the market for municipal maintenance buildings with lower operational costs. The System provides:

- Full, uncompressed installed R-values of insulation.
- Lower monthly energy costs with up to 50% reduction in HVAC equipment.
- The capability of extending the life of the building by increasing the strength of the structure with the steel straps as well as minimizing the three heat transfers commonly associated with metal buildings (conduction, convection and radiation).
- Class A fire safety rating that may assist in reducing property insurance premiums.
- The ability to control and maintain uniform temperatures to increase the comfort of employees. Studies show there is a direct correlation between employee comfort levels and productivity.
- Easy accessibility for various ceiling hangers for attaching common items while preserving the integrity of the vapor retarder.
- A bright and clean interior requiring fewer light fixtures with light reflectivity up to 85%.
- Better acoustics with higher sound absorption (75% noise reduction).
- Free design-build energy analysis sales materials.

The Simple Saver System has helped thousands of municipalities and city governments minimize energy consumption and maintain a quality working environment. If you are building new or contemplating retrofitting an existing facility, consider using the Simple Saver System in your next project. Call Thermal Design today at (800) 255-0776 for more information on why the Simple Saver System is the best solution for your facilities.
