

Simple Saver[®] System

with OSHA Compliant Through Fall Protection

— featuring —
Perfectly Square[™]

Perfectly Square Edge Markers[™] streamline the alignment and clamping of the Syseal[™] liner system fabric throughout the entire bay. Thermal Design's innovative edge markers help ensure precision, efficiency and aesthetics when installing the Simple Saver System. Perfect for training new employees and a valuable feature recognized by experienced installers.

1 Reduces Wrinkles

2 Installs Faster

3 Starts Fabric Square

Perfectly Square Edge Markers[™]

Printed in parallel along both edges of the Syseal[™] fabric every **3 inches** and features matching sequential numbers printed every **12 inches***. Exclusively available with Thermal Design Liner Systems:

AutoCeil[™] • Simple Saver[®] • MBI Safety Liner System[™] • EnergyCraft[®]

*Based on standard size white fabric pieces. Subject to availability.

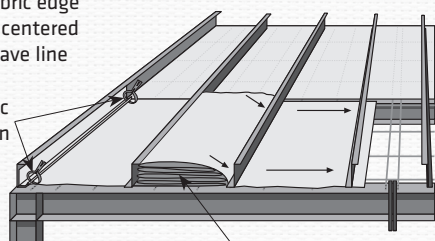

0104

0104

Start Square

Keep the fabric edge square and centered with the eave line

Clamp fabric into position

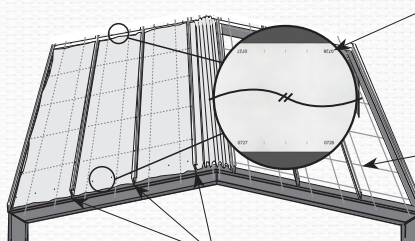

Pleat-folded Syseal[™] fabric
Arrows indicate direction of pulling fabric

Stay Square

Perfectly Square Edge Markers printed along edge of Syseal fabric

UVMAX[™] Steel Support Strapping

Purlin and clip attachments on top of rafter

Starting the fabric square and centered reduces potential wrinkles, improves aesthetics, and minimizes installation errors from start to finish.
