SAFETY DATA SHEET

Emergency Phone: Chemtrec 800-424-9300

SDS Name: G720 Simple Saver Air-Tight Sealant™
Issue Date: October 26, 2015

Section 1 - Product and Company Information
Product Name: G720 Simple Saver Air-Tight Sealant™
Company Identification: Thermal Design, Inc, 601 N. Main St. Madison, NE 68748
Information phone (402) 454-6591
Product Classification: Caulk, Sealant
General Description: Siliconized acrylic caulk
Color: Off white, dries clear
Odor: Slight mild odor

Section 2 - Hazards Identification
OSHA/HCS Status: This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200). CARCINOGENICITY - Category 1A
Classification of the substance or mixture: Percentage of the mixture consisting of ingredient(s) of unknown toxicity: 72.5%
Physical Hazards: Not classified
GHS Label Elements
Signal Word: Danger

Hazard Statement: May cause eye/lung/ skin irritation. May cause Cancer. May cause genetic defects. May cause damage to organs through prolonged exposure.

Precautionary Statement Prevention: Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves / protective clothing / eye protection / face protection. Wash well after handling. Contaminated work clothing should not be allowed out of work place.

Response: SKIN: Wash with plenty of soap and water. If skin irritation or rash occurs: Get medical attention / advice. Get medical attention / advice if you feel unwell. EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritant persists get medical attention / advice.
If exposed or concerned: get medical attention or advice. Take off contaminated clothing and wash it before reuse.

Storage: Store locked up.
Disposal: Disposal of contents / container in accordance with local / regional /state / federal and international regulations.

Hazard(S) not Otherwise classified (HNOC):
Supplemental Information: None known.
Substance(s) formed under the conditions of use:
Sanding and grinding dusts may be harmful if inhaled. This product contains Crystalline Silica which can cause lung cancer or silicosis. The risk of cancer depends on the duration and level of exposure to dust from sanding surfaces or mist from spray applications. Since this product is not meant to be sanded or sprayed, risk of exposure is considered low. Avoid contact with skin and clothing. Wash thoroughly after handling. Emits toxic fumes when heated.
HMIS (Ratings):

<table>
<thead>
<tr>
<th>Subcode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>2*</td>
<td>Chronic effects</td>
</tr>
</tbody>
</table>

Flammability: 1

Physical hazard: 0

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks. Although HMIS® ratings are not required on SDSs under 29 CFR 1910.1200, the preparer may choose to provide them.

SUB codes represent substances without registered CAS Numbers.

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4 - First Aid Measures

If ingestion, irritation, any type of overexposure or symptoms of overexposure occur during or persists after use of this product, contact a POISON CONTROL CENTER, EMERGENCY ROOM OR PHYSICIAN immediately; have Safety Data Sheet information available. Never give anything by mouth to an unconscious or convulsing person.

Description of necessary first aid measures

Eye Contact: Check for and remove any contact lenses. Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Seek immediate medical attention.

Inhalation: Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.

Skin Contact: Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners.

Ingestion: If swallowed, seek medical advice immediately and show this container or label. Keep person warm and at rest. Do NOT induce vomiting.

Most important symptoms/effects, acute and delayed

Potential acute health effects

Eye Contact: Direct contact may cause slight to moderate irritation.

Inhalation: May cause slight irritation to respiratory passages – headache – dizziness.

Skin Contact: May cause allergic skin reactions and / or central nervous system depression.

Ingestion: No known significant effects or critical hazards. Low ingestion hazard.

Over-exposure signs/symptoms

Eye Contact, Inhalation, Skin Contact, Ingestion: No specific data.

Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician: Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.

Specific treatments: No specific treatment.

Protection of first-aiders: No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.
Section 5 - Fire Fighting Measures (Flash, UEL, LEL for solvent only)
Suitable extinguishing media: Use an extinguishing agent suitable for the surrounding fire.
Unsuitable extinguishing media: None known.
Specific hazards arising from the chemical: In a fire or if heated, a pressure increase will occur and the container may burst. This material is harmful to aquatic life. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.

Hazardous thermal decomposition products
Specific protective equipment and precautions for firefighters:
Decomposition products may include the following materials: carbon dioxide, carbon monoxide, metal oxide/oxides
Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
Move containers from fire area if you can do so without risk.

Fire Fighting equipment / Instructions:
Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

General fire hazards:

Section 6 - Accidental Release and Disposal Measures
Personal precautions, protective equipment and emergency procedures For non-emergency personnel:
No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Put on appropriate personal protective equipment. No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Put on appropriate personal protective equipment.

Methods and materials for containment and cleaning up:
Small Spills: Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor. Prevent further leakage or spillage if safe to do so.

Environmental precautions:

Section 7 - Handling and Storage
Precaution for safe handling:
Protective measures: Put on appropriate personal protective equipment (see Section 8). Avoid exposure - obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.
Special precautions: If this material is part of a multiple component system, read the Safety Data Sheet(s) for the other component or components before blending as the resulting mixture may have the hazards of all of its parts.
Advice on general occupational hygiene: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed.
Conditions for safe storage, Including any incompatibilities:

Do not store below the following temperature: 5°C (41°F). Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

Key to abbreviations
- A = Acceptable Maximum Peak
- S = Potential skin absorption
- ACGIH = American Conference of Governmental Industrial Hygienists.
- C = Ceiling Limit
- SR = Respiratory sensitization
- SS = Skin sensitization
- F = Fume
- STEL = Short term Exposure limit values
- IPEL = Internal Permissible Exposure Limit
- TD = Total dust
- OSHA = Occupational Safety and Health Administration.
- TLV = Threshold Limit Value
- R = Respirable
- TWA = Time Weighted Average

Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
Environmental exposure controls:

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Individual protection measures

Hygiene measures:

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period.

Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection:

Safety glasses with side shields.

Skin protection

Hand protection:

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.

Body protection:

Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Other skin protection:

Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Respiratory protection:

Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary.

Section 9 - Physical and Chemical Properties

Appearance

Paste

Physical state:

Off white, dries clear

Color:

Mild Acrylic

Odor:

Not available.

Odor threshold:

7.5-8.5

pH:

Not available.

Melting point:

>37.78°C (>100°F)

Boiling point:

Closed cup: >93.89°C (>201°F)

Flash point:

Yes.

Material supports combustion:

Not available.

Auto-ignition temperature:

Not available.

Flammability (solid, gas):

Not available.

Lower and upper explosive (flammable) limits:

Evaporation rate:

0.33 (butyl acetate = 1)

Vapor pressure:

2.3 kPa (17.5 mm Hg) [room temperature]

Vapor density:

Not available.

Relative density:

1.68
Density (lbs/gal): 14.02
Solubility: Soluble in water.
Partition coefficient: n- octanol/water: Not available.
Viscosity: 15-40 g/s
% Solid. (w/w): 82.9

Section 10 - Stability and Reactivity
Reactivity:
No specific test data related to reactivity available for this product or its ingredients.
The product is stable.
Under normal conditions of storage and use, hazardous reactions will not occur.
When exposed to high temperatures may produce hazardous decomposition products. Refer to protective measures listed in sections 7 and 8.
Keep away from the following materials to prevent strong exothermic reactions: oxidizing agents, strong alkalis, strong acids.
Decomposition products may include the following materials: carbon monoxide, carbon dioxide, smoke, oxides of nitrogen.

Target organs: Contains material which may cause damage to the following organs: lungs, upper respiratory tract, skin, eyes.
Aspiration hazard  Not available.

Information on the likely routes of exposure
Potential acute health effects
Eye contact, Inhalation, Skin contact, Ingestion:  No known significant effects or critical hazards.
Over-exposure signs/symptoms
Eye contact, Inhalation, Skin contact, Ingestion:  No specific data.
Delayed and immediate effects and also chronic effects from short and long term exposure
Conclusion/Summary:

There are no data available on the mixture itself. This product contains crystalline silica which can cause lung cancer or silicosis. The risk of cancer depends on the duration and level of exposure to dust from sanding surfaces or mist from spray applications. If splashed in the eyes, the liquid may cause irritation and reversible damage. Ingestion may cause nausea, diarrhea and vomiting. This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact.

Short term exposure
Potential immediate effects, potential delayed effects:
Long term exposure
Potential immediate effects, potential delayed effects:

Potential chronic health effects
General:  No known significant effects or critical hazards.
Carcinogenicity:

Mutagenicity, Teratogenicity, Developmental effects
Fertility effects:

No known significant effects or critical hazards.
May cause cancer. Risk of cancer depends on duration and level of exposure.

Section 13 - Disposal Information
Disposal methods: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
Disposal should be in accordance with applicable regional, national and local laws and regulations. Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees. Section 6. Accidental release measures
